

How to release a taxonomy after CVLM

Abstract

The Value List Management Tool in E2 enables authorized users to create, edit, and disable values in value lists efficiently, with full tracking and collaborative functionality.

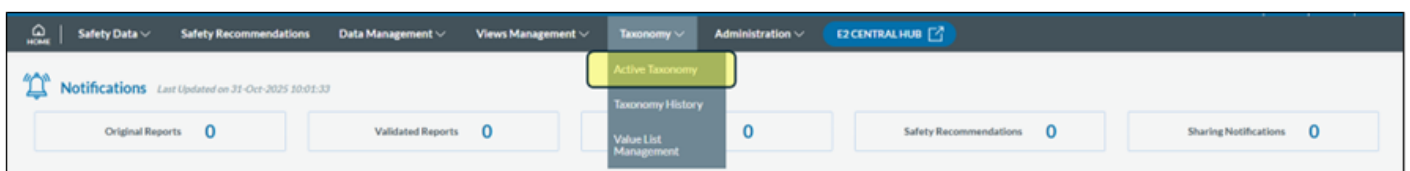

Some background

Every month, all collaborative value lists that were modified in the Collaborative Value List Manager (CVLM) must be embedded into a new taxonomy. This taxonomy update is part of the monthly E2 release.

A new taxonomy

For all actions you need to be logged in as an EASA_ECCAIRS user

Create a new draft taxonomy

Value List Management

All snapshots that have the status “to be released” need to be validated.

Value List Management - Snapshots

Generate all Snapshots

Pending To be Created

TaxName - Origin	TaxVersion - Origin	VL Description	VL Explanation	VL Branch	Delegated Authority	Status	TaxName - Released	TaxVersion - Released	Release Date	
Eccairs Aviation 6.0.0.0	6.0.0.0 (3)	VL for AttrID: 215 - Operators	VL for AttrID: 215 - Operators	Luxembourg	Luxembourg (CAA)	To be Released				View VL Snapshot Validate Reject

125Items per page

Once a snapshot is validated, it will be part of the next taxonomy release.

Check for conflicts

Before releasing the taxonomy it is key that there are no conflicts that need to be resolved
