

4.9. Taxonomy version number and name

The Custom Taxonomy version and name is built as follows:

- 'ECCAIRS Aviation' string concatenated with:
- Authority code - taken from the Authority details, followed by an underscore. i.e. BE_
- Four-digit version code, which shows the Central Taxonomy version on which the Custom is based. i.e. 8.0.3.1
- Custom version number, in parenthesis. E.g. (C1)

Eccairs Aviation 8.0.3.1	TAXONOMY	8.0.3.1
Eccairs Aviation_BE_8.0.3.1 (C3)	CUSTOM Belgium CAA	8.0.3.1 (C3)
