

8. Metadata fields

This section includes the list of metadata fields used in E2.

8.1. Metadata fields accessibility

The metadata fields stored in an OR, VR, OC, or SR (report, from now on), along with the taxonomy entities and attributes, provide essential information that is automatically populated by the system throughout the report lifecycle. These metadata fields are visible when reports are exported, when they are selected as custom columns in the report lists, utilized in queries, or when API methods are executed.
